Profile

Backend developer with solid production experience building Laravel systems served in real-world environments including ERP deployments and RESTful API platforms. Comfortable working on complex systems involving multiple user roles structured workflows and layered business logic. Strong foundation in database design with MySQL and PostgreSQL. National cybersecurity CTF champion with a practical understanding of secure system design. Actively uses AI-assisted development tools in daily workflow and adapts quickly to new codebases and architectural patterns.

Work Experience

Backend Developer, *Tibeb Tutorials* 02/2025 – Present
Remote

- Designed and maintained production RESTful APIs using Laravel and MySQL for a tutoring platform with multiple user roles and content delivery workflows
- Structured backend using service layer architecture keeping business logic separated from controllers and improving long-term maintainability
- Optimized database queries and Eloquent relationships to reduce response times for high-frequency frontend requests
- Coordinated API design with frontend developers to maintain consistent integration contracts across the application

Odoo Developer | Part-Time, *Melmet Trading* 07/2024 – 05/2025

- Customized and deployed Odoo ERP modules for multiple enterprise clients covering procurement inventory and accounting workflows

Founder & Full-Stack Engineer — YeneTTS 07/2026 – Present

- Built and launched a live-stream donation platform for Ethiopian creators. Serving over 350+ content creators to monetize their content.
- Built it with Next.js/TypeScript, Laravel and MySQL, plus a Python text-to-speech service. Added Telebirr and M-Pesa payments and filtering for blocked words.
- Run production on Docker, nginx and Cloudflare, with separate dev, staging and production environments and CI/CD through GitHub Actions.

Web Security Educator / Developer, *Yekolo Temari community* Present

- Built an interactive platform where students practice finding and exploiting web vulnerabilities, used across 10+ community events
- Designed challenges covering XSS, SQL injection, CSRF, authentication bypass, and session management flaws
- Led secure web development workshops for university students and community members.

Upwork Freelancing Remote

- Delivered web/backend development, Telegram bot development, Automation projects for clients as an independent contractor through Upwork.
- Managed full project lifecycle from requirement gathering through delivery working directly with clients.

Education

Bsc Computer Science, *Saint Marry University* 05/2021 – 02/2026
Graduated 2026. Addis Ababa

African to Silicon Valley (A2SV) Addis Ababa
Learned about Data structure and algorithm throughout year and build different problem solving projects.

Skills

Backend & Database
Laravel, Flask, Fastapi, MYSQL, Postgres, Supabase

Mobile
Flutter

Others
Python, PHP, Linux, cloud setup, Docker, AI agent orchestration.

Awards

Cybersecurity National CTF Winner 01/12/2022
Won 1st place in Sub-Saharan Africa Regional Cybersecurity CTF that was organized Online by CyberTalents on 7th October 2023.

Projects

Afromessage Python SDK
Built and published a Python SDK wrapping the AfroMessage SMS API covering single SMS bulk SMS OTP generation and code verification

SantimPay laravel SDK
Built a Laravel SDK wrapping the SantimPay payment gateway API documentation.
